"Junk_Eater User Manual"

This is only for Windows Computers... :)

Installation...

Step 1.

Go to the link...

https://github.com/pd15ms089/Junk_eater Or,

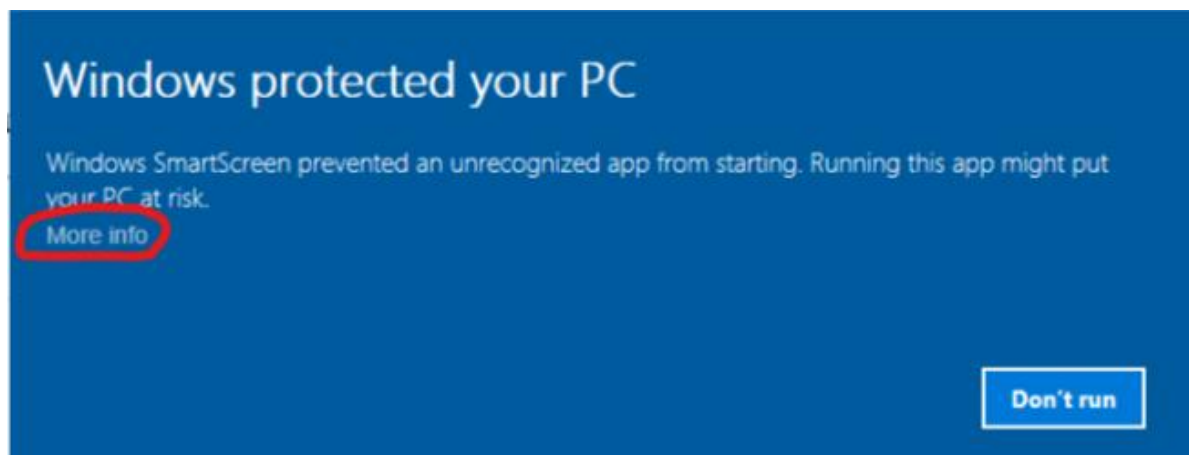

<https://drive.google.com/open?id=0Bzl-VlsjLqouUUZydU12RjFXbjA>

and download the installer.

Step 2.

Go to the folder where you have downloaded it.

Find, double click to run. Then this screen will pop up...

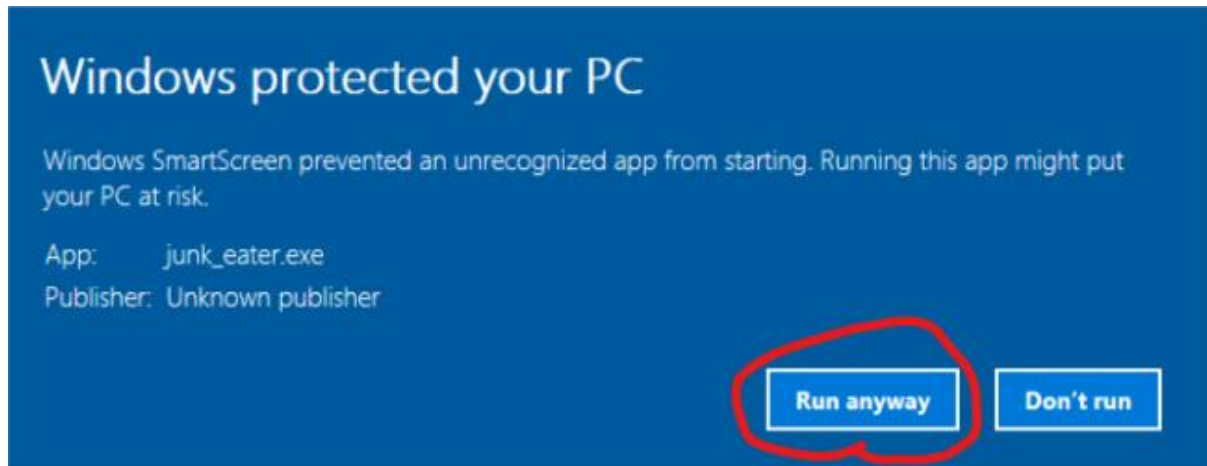

Don't worry !!! As you downloaded this from open link, So your system is just giving you an alert...

Go to "More info".

Step 3.

Then the screen below will pop up...

Go ahead and click “**Run anyway**”. Then just follow the setup Screen and install it.

Don't Worry !!! --- If there is something wrong for your system it will prevent itself from installation. Again once I am assuring you that here is no VIRUSES. I know very little programming and the guys who develop VIRUSES are masters in this things . :)

Run App...

Now run the app by clicking or double clicking on it. Wait it will take few seconds to start (initialize). Then it will run. Try to use the app **once in a day** to get rid of junk files of your PC.

~ Junk_eater also loves to eat Junk foods. ☹️
